

BASIC-SYSTEM

Product code: 115701

The system box – the heart of ecell-guard

- Secure storage location for the fire containment blanket
- Automatic release process for rapid response
- Includes deflection set for optimal handling

The ecell-guard BASIC system can be installed as a single or multi-system.

SINGLE SYSTEM

Each individual system requires a fire alarm system (FAS).

MULTI SYSTEM

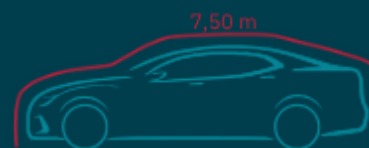

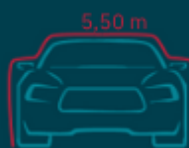

The number of fire alarm systems required for the multisystem depends on the building layout. One fire alarm system (FAS) supports a maximum of 25 BASIC systems.

DIMENSIONS AND WEIGHT

single system:	width: 2,48 m		height: 0.39 m		depth: 0.60 m		weight: approx. 180 kg
max. vehicle dimensions:			width: 2.20 m		height: 2.10 m		length: 5.20 m

- ! Width dimension including exterior mirrors. Roof and rear attachments are not permitted. The extended vehicle length (silhouette length) must not exceed 7.50 meters, and the width must not exceed 5.50 meters.

SCOPE OF DELIVERY

1 x system box (ready for installation, including accessories)	2 x smoke and heat detectors (Art.-Nr. 118082)
1 x Acoustic & optical signal alarm (Art.-Nr.118085)	1 x drive-on ramp (Art.-Nr.118347)
1 x fire containment blanket (pre-prepared) (Art.-Nr. 115700)	1 x Input/Output Module BX-O2I4 (Art.-Nr. 118148)
1 x mounting kit	

- ! The ecell-guard BASIC system does not include a fire alarm system. It must be added separately, as it can be used for several systems in parallel.
